

## ***Road map for the java with data structure and algorithm***

We have a variety of Data Structures which are as follows:

1. [Arrays](#)
2. [Strings](#)
3. [Linked List](#)
4. [Stack](#)
5. [Queue](#)
6. [Heap and Priority Queue](#)
7. [Hashmap](#)
8. [Binary Tree](#)
9. [Binary Search Tree](#)
10. [AVL Tree](#)
11. [Red Black Tree](#)
12. [Trie](#)
13. [Suffix Tree](#)
14. [Graph](#)
15. [Segment Tree](#)
16. [Fenwick Tree](#)
17. [Sparse Table](#)
18. [Set](#)

### **Arrays**

1. [Single Number](#)
2. [Sliding Window](#)
3. [Find the Number Occurring Odd Number of Times](#)
4. [Next Permutation](#)
5. [Searching and Sorting in Rotated Sorted Array](#)
6. [Radix Sort](#)
7. [Bucket Sort](#)
8. [Counting Sort](#)
9. [Heap Sort](#)
10. [Smallest Index with Equal Value](#)
11. [Aggressive Cows](#)
12. [Book Allocation Problem](#)
13. [Binary Search Vs Ternary Search](#)
14. [Ternary Search](#)
15. [Square Root using binary search](#)
16. [Divide the Chocolate](#)
17. [Find the minimum element in a sorted and Rotated Array](#)
18. [Minimum coverage by heaters](#)
19. [Plates Between Candles](#)
20. [To Find the Nth Number in the Merged and Sorted Lists of Given Ranges](#)
21. [Find the Maximum Sum of  \$i \cdot \text{arr}\[i\]\$  Among all Possible Rotations of an Array](#)
22. [Multiple left rotations of an array with  \$O\(1\)\$](#)

23. [Reversal algorithm for right rotation of an array](#)
24. [Reversal Algorithm for Array Rotation](#)
25. [Rotation Count](#)
26. [Program for Array rotation in Java](#)
27. [Sort a Rotated Sorted Array](#)
28. [Sort a Rotated Sorted Array](#)
29. [Moore's Voting Algorithm](#)
30. [Next Greater and Smaller Element for Every Element in an Array](#)

## String

1. [Count Valleys](#)
2. [Compare Version Numbers](#)
3. [Count and Say](#)
4. [Longest word in dictionary](#)
5. [Check If a String is a Palindrome](#)
6. [Car Fleet](#)
7. [String matching naive](#)
8. [KMP String Matching Algorithm](#)
9. [Rabin Karp](#)

## Linked List

1. [Why is Quick Sort preferred for Arrays and Merge Sort for Linked Lists?](#)
2. [Application of Linked List Data Structure](#)
3. [Linked List remove\(\) Method in Java](#)
4. [How to Convert all LinkedHashMap Values to a List in Java](#)
5. [Difference between a singly linked list and a doubly linked list](#)
6. [Create Linked List From A Given Array](#)
7. [Binary search on Linked List](#)
8. [Insert a node at a specific position in a linked list](#)
9. [Deletion of a linked list](#)
10. [Unrolled linked list](#)
11. [Implementing a Linked List in Java Using Class](#)
12. [LinkedList descendingIterator in Java](#)
13. [Construct a Linked List from a 2D Matrix](#)
14. [Advantages and Disadvantages of LinkedList](#)
15. [LinkedList implementation in JavaScript](#)
16. [Is it possible to reverse a linked list in less than  \$O\(n\)\$ ?](#)
17. [How to write the functions that modify the head pointer of a Linked List in C?](#)
18. [Generic Linked List in C](#)
19. [LinkedList listIterator\(\) method in Java](#)
20. [Java.util.LinkedList.offer\(\), offerFirst\(\), offerLast\(\) in Java](#)
21. [Retrieving Value from a LinkedHashMap by Index in Java](#)
22. [LinkedList removeFirst method in Java](#)
23. [LinkedList add\(\) method in Java](#)
24. [LinkedList addAll\(\) method in Java](#)
25. [Singly Linked List To Circular Linked List](#)
26. [Check If A Linked List Is Circular Linked List](#)
27. [Circular Linked List Traversal](#)

28. [Convert a given Binary Tree to Doubly Linked List](#)
29. [Reverse a Doubly-Linked List in Given Size](#)
30. [Memory-efficient doubly linked list](#)

## **Stack**

1. [Stack in C++ \(STL\)](#)
2. [Stack Class in Java Collection Framework](#)
3. [Stack in Python \(LIFO Queue\)](#)
4. [Python Stack Using Doubly Linked List](#)
5. [Difference Between Stack and Tree](#)
6. [Difference between Array, Queue and Stack](#)
7. [Implement stack using a singly linked list](#)
8. [Implement stack using a doubly-linked list](#)
9. [Next greater/smaller element using a monotonic queue](#)
10. [Iterative Tower of Hanoi](#)
11. [Remove Adjacent Duplicates](#)
12. [Design A Minimum Stack](#)
13. [Trapping Rainwater](#)
14. [Delete Middle Element Of The Stack](#)
15. [Count array elements having at least one smaller element on its left and right side](#)
16. [Minimize the length of a given string by removing subsequences forming valid parenthesis](#)
17. [Add two numbers represented by Stacks](#)
18. [Diagonal Traverse ii](#)
19. [Minimize a binary string by repeatedly removing even-length substrings of the same characters](#)
20. [Minimize A String By Removing All Occurrences Of Another String](#)
21. [Maximum Equal Sum in Three Stacks](#)
22. [Print Stack Elements from Top to Bottom](#)
23. [Smallest String Obtained By Removing All Occurrences of 01 and 11 from the Binary String](#)
24. [Count of days remaining for the next day with higher temperature](#)
25. [Count of strings that do not contain Arc intersection](#)
26. [Minimize Length of a String by Removing Pairs of Consecutive Increasing or Decreasing Digits](#)
27. [Largest rectangle in histogram](#)
28. [Reverse a linked list using Stack](#)
29. [Count subarrays for every array element in which they are the minimum](#)
30. [Check if a string is a subsequence of another string using stack](#)

## **Queue**

1. [Difference between Queue and Deque in C++](#)
2. [Advantages of circular queue over linear queue](#)
3. [Queue of Pairs in C++ STL](#)
4. [Implementation Of Queue in Java using Array and Generics](#)
5. [How to remove a specific element from queue](#)
6. [Queue Remove Method in Java](#)
7. [Dumping Queue Into List or Array in Python](#)

8. [Find the index of the array elements after performing given operations k times](#)
9. [Find Nth positive number whose absolute difference of adjacent digits is at most 1](#)
10. [Circular queue implementation and operations](#)
11. [Implement dynamic Deque using templates class and a circular array](#)
12. [Design Front Middle Back Queue using STL](#)
13. [Implementation of Deque Using Doubly Linked List](#)
14. [Generate a permutation of first N natural numbers having count of unique adjacent differences equal to K](#)
15. [Array obtained by repeatedly reversing array after every insertion from the given array](#)
16. [First non-repeating character in a stream](#)
17. [How to efficiently implement k Queues in a single array?](#)
18. [Sorting of Queue](#)
19. [Queue Reconstruction by Height](#)

## **Heap and Priority Queue**

1. [Applications of Heap - Data Structure](#)
2. [Binary Heap](#)
3. [Tournament Trees and Binary Heaps](#)
4. [Implementation of Heap](#)
5. [Binomial Heap](#)
6. [Fibonacci Heap](#)
7. [Leftist Heap](#)
8. [N-ary Heap](#)
9. [Priority Queue using Java](#)
10. [Priority Queue Implementation using Linked List](#)
11. [Priority Queue Using Doubly Linked List](#)
12. [Priority Queue Using a Linked List](#)
13. [Priority Queue using array in C++](#)
14. [Priority Queue using C++](#)
15. [Applications of Priority Queue](#)
16. [Double Ended Priority Queue](#)
17. [Priority Queue of Pairs In C++ with Ordering](#)
18. [Converting a BST to Min Heap](#)
19. [Kth smallest element in a row-wise and column-wise sorted 2D array](#)
20. [N Max Pair Combinations](#)
21. [Connect N Ropes](#)
22. [Median of Stream of Integers Problem](#)
23. [Connect N ropes with minimum cost](#)
24. [Sum and product of K smallest and largest Fibonacci numbers in the array](#)
25. [K-th Smallest Pair Sum in The Given Array](#)
26. [Maximum product of an Array after subtracting 1 from any element N times](#)
27. [Find the K closest points to origin using Priority Queue](#)
28. [Length of longest subsequence such that prefix sum at every element remains greater than zero](#)
29. [The maximum sum of two non-overlapping intervals in a list of Intervals | Interval Scheduling Problem](#)

30. [Minimum difference between maximum and minimum value of Array with given Operations](#)

## HashMap

1. [Implementation of HashMap](#)
2. [Index Mapping](#)
3. [Double hashing](#)
4. [Load Factor and Rehashing](#)
5. [Hash Table vs STL Map](#)
6. [Difference between HashMap and Hash Table in Java](#)
7. [Separate Chaining and Open Addressing for Collision Handling](#)
8. [Binary Subarrays with sum](#)
9. [LRU Cache Implementation](#)
10. [Asteroid Collision](#)
11. [Count Number of Subarrays with Sum K](#)
12. [Reduce Array Size to The Half](#)
13. [Minimum operations to choose Array elements with sum as K by choosing an element from the front, or rear or both](#)
14. [Length Of All Prefixes That Are Also The Suffixes Of The Given String](#)
15. [Online Election](#)
16. [Find the highest frequency of non-negative powers that are the same as indices of elements in the given array](#)
17. [Longest Substring Without Repeating Characters](#)
18. [The K Weakest Rows in a Matrix](#)
19. [Count the Triplets](#)
20. [Kth Distinct String in an Array](#)
21. [Stone Game VI](#)
22. [Permutation in String](#)
23. [Find All Duplicates in an Array](#)
24. [Longest Consecutive Sequence](#)
25. [N Repeated Elements in Size 2N](#)
26. [Custom Sort String](#)
27. [Winner of Tic-Tac-Toe](#)

## Binary Tree

1. [Binary Tree using dstructure library in Python](#)
2. [Types of Binary trees](#)
3. [Create a Balanced Binary Tree using leaf Nodes of a Binary Tree without using Extra Space](#)
4. [N-Ary Trees](#)
5. [Construct a Binary Tree from a given Preorder and Inorder traversal](#)
6. [The Binary Lifting Technique](#)
7. [Construct a Complete Binary Tree from its Linked List Representation](#)
8. [Convert a generic tree \(n-ary tree\) to binary tree](#)
9. [Double Order Traversal of a Binary Tree](#)
10. [Specific Level Order Traversal of Binary Tree](#)
11. [Iterative Postorder Traversal of Binary tree](#)
12. [Iterative Postorder Traversal of a binary tree | Part-2](#)

13. [Iterative Preorder Traversal of Binary tree](#)
14. [Clockwise Triangular Traversal of a Binary Tree](#)
15. [Level Order Traversal Of A Binary Tree](#)
16. [ZigZag Traversal of Binary Tree](#)
17. [Boundary Traversal Of Binary Tree \(Recursive and Iterative\)](#)
18. [Iterative Inorder Traversal of Binary tree](#)
19. [Morris Traversal for Inorder](#)
20. [Print all Prime Levels of a Binary Tree](#)
21. [Bottom-left to upward-right Traversal in a Binary Tree](#)
22. [Check if given inorder and preorder traversals are valid for any Binary Tree without building the tree](#)
23. [Construct A Perfect Binary Tree From A Preorder Traversal](#)
24. [Inorder Successor in Binary Tree](#)
25. [Right View of a Binary Tree](#)
26. [Left View of a Binary Tree in Java](#)
27. [Top view of a binary tree | Part-1](#)
28. [Diameter of Binary Tree](#)
29. [Convert a given Binary Tree to a Doubly Linked List](#)
30. [Symmetric Binary Tree](#)

## **Binary Search Tree**

1. [Introduction to Binary Search tree](#)
2. [Difference between binary tree and binary search tree](#)
3. [Inbuilt Binary Search in Different Languages](#)
4. [Binary Search Tree | Iterative Delete](#)
5. [Implementing Backward Iterator in BST](#)
6. [Implementing Forward Iterator in BST](#)
7. [Insertion in Binary Search Tree](#)
8. [Insert a node in Binary Search Tree Iteratively](#)
9. [Construct BST from the given pre-order traversal](#)
10. [Construct a BST from given postorder traversal using Stack](#)
11. [Lowest Common Ancestor in a Binary Search Tree](#)
12. [Finding inorder predecessor of a node in a Binary Search Tree](#)
13. [Finding Inorder Successor of a node in a Binary Search Tree](#)
14. [Number of Binary Search Trees of height H consisting of H+1 nodes](#)
15. [Range Sum of BST](#)
16. [Flatten a Binary Search Tree to Convert the Tree into a Wave List in Place Only](#)
17. [Flattening BST in Sorted List](#)
18. [Row with the maximum number of 1's](#)
19. [Create a wave array from the given Binary Search Tree](#)
20. [Sum of all nodes with smaller values at a distance 'K' from the given node in BST](#)
21. [Median of All Nodes from a Given Range in a BST](#)
22. [Print All Odd Nodes Of Binary Search Tree](#)
23. [Print all the even nodes of a Binary Search Tree](#)
24. [Node with the maximum value in a Binary Search Tree](#)
25. [Sum and the Product of minimum and maximum elements of a Binary Search Tree](#)
26. [Find Closest Smaller Value For Every Element In Array](#)

27. [Find Closest Value For Every Element In Array](#)
28. [Find the median of BST in O\(N\) time and O\(1\) space.](#)
29. [Kth Largest Element BST](#)
30. [Largest BST subtree in the given Binary Tree](#)

## **AVL Search Tree**

1. [Self Balancing Binary Search Trees](#)
2. [Introduction To AVL Trees](#)
3. [How to Insert Strings into an AVL Tree](#)
4. [Optimal Sequence for AVL Tree Insertion](#)
5. [Deletion in AVL Tree](#)
6. [Insertion, Searching, and Deletion in AVL trees containing a parent node pointer](#)

## **Red Black Tree**

1. [Introduction To Red-Black Trees](#)
2. [Red Black Tree Insertion](#)
3. [Red-Black Trees Top-Down Insertion](#)
4. [Deletion in Red-Black Trees](#)
5. [Red-Black Tree \(Delete\)](#)
6. [Insertion in Left-Leaning Red-Black Tree](#)
7. [Check if a given Binary Search Tree is height-balanced like a Red-Black Tree](#)
8. [Find the largest K for every Array element such that at least K prefixes are  \$\geq K\$](#)

## **Trie**

1. [Introduction and implementation of Trie](#)
2. [Dictionaries using Tries](#)
3. [Delete nodes from trie](#)
4. [Advantages of Trie Data Structure](#)
5. [Pattern Searching using Trie](#)
6. [Longest word in dictionary](#)
7. [Implement Forward DNS Look Up Cache](#)
8. [Implement Reverse DNS Look Up Cache](#)

## **Suffix Tree**

1. [Suffix Array Construction \(Brute Force  \$N^2 \log N\$ \)](#)
2. [Suffix Trees \(Implementation - Brute Force\)](#)
3. [Find the indices of all the occurrences of a pattern in a string](#)
4. [Longest Palindromic Substring using a suffix tree](#)

## **Graph**

1. [Introduction to Graphs](#)
2. [Graph Representation](#)
3. [Implementation of Graph in Java](#)
4. [Implementation of Graph in Python](#)
5. [Graph Theory](#)
6. [Graph Types and Applications](#)
7. [Construct a Graph from the size of components of each node](#)
8. [Graph And Tree](#)
9. [Pendant Vertices, Non-Pendant vertices, Pendant Edges, and Non-Pendant Edges of the Graph.](#)

10. [Properties of Graph](#)
11. [Breadth-First Search](#)
12. [Minimum length paths between 1 to N including each node](#)
13. [Check if the given permutation is a valid BFS of a given tree](#)
14. [Find integral points with minimum distance from given set of integers using BFS](#)
15. [Implement Water Supply System](#)
16. [0-1 BFS](#)
17. [01 Matrix](#)
18. [DFS Traversal of a Graph - Iteratively](#)
19. [Check if there are at least T continuous blocks of 0s or not in a Binary Matrix](#)
20. [Find Regions with Most Common Region Size in a Given Boolean Matrix](#)
21. [Clone of an undirected graph](#)
22. [Course Schedule](#)
23. [Topological sort without Kahn's algorithm](#)
24. [Clone a Directed Acyclic Graph](#)
25. [Word Ladder](#)
26. [Minimum Cost Path in a directed graph via a given set of necessary nodes](#)
27. [Stepping Numbers](#)
28. [Print all paths from a given source to a destination](#)
29. [Accounts Merge](#)
30. [Euler and Hamiltonian Paths](#)

## **Segment Tree**

1. [Introduction to Segment Trees](#)
2. [Segment Tree](#)
3. [Merge Sort Tree For Range Order Statistics](#)
4. [Length of Longest Increasing Subsequences \(LIS\) using Segment Tree](#)
5. [Count of Xs in the Array for a given range of indices after array updates for Q queries](#)
6. [Longest Subarray with GCD Greater than 1](#)
7. [Count Substrings having Frequency of a Character Exceeding that of Another Character in a String](#)
8. [Queries to Calculate the Sum of the Array Elements Consisting of an Odd Number of Divisors](#)
9. [Queries to Calculate Sum of Squares of ASCII Values of Characters of a Substring with updates](#)
10. [Queries to calculate sum of squares of array elements over range of indices \[L, R\] with updates](#)
11. [Range Update in a Segment Tree without using Lazy Propagation and Point Query](#)
12. [Queries to Count Array Elements from a Given Range having a Single Set Bit](#)
13. [Queries to Find The First Array Element Exceeding K with Updates](#)
14. [Maximize value of a pair from two given arrays based on given conditions](#)
15. [Range minimum query](#)
16. [Queries to find the min index in a range \[L, R\] having at least value ele with updates](#)
17. [Queries to calculate sum with alternating signs of array elements in a given range](#)
18. [Query to find the length of the longest subarray consisting of only 1s](#)

19. [Maximize the length of longest subarray consisting of same elements by at most X decrements](#)
20. [Maximum length of same indexed subarrays from two given arrays satisfying the given condition](#)
21. [Queries to Count Array Elements Greater Than or Equal to a given Number with Updates](#)
22. [Maximize sum of array by reducing array elements to contain no triplets \(i, j, k\) where  \$a\[i\] < a\[j\]\$  and  \$a\[i\] < a\[k\]\$  and  \$j < i < k\$](#)
23. [Queries to Evaluate the given Expression in a range \[L, R\]](#)

## **Fenwick Tree**

1. [Find Value After N Operations to Remove N Characters of String S with Given Constraints](#)
2. [Sum of previous numbers that are greater than current number for given array](#)
3. [Finding XOR of the Array Elements in a Given Range with Updates using Fenwick Tree](#)
4. [Queries for the Number of Nodes having Values Less than V in the Subtree of a Node](#)
5. [Count smaller elements on right side and greater elements on left side using Binary Index Tree](#)
6. [Find the Number of Pair of Ideal Nodes in a Given Tree](#)
7. [Range Sum Queries and Update with Square Root](#)
8. [Number of elements greater than K in the range L to R using Fenwick Tree \(Offline queries\)](#)
9. [Count of Inversion of size K in a given array](#)
10. [XOR of Numbers that Appeared Even Number of Times in Given Range](#)
11. [Sum of Interval and Update with Number of Divisors](#)
12. [Maximum Sum of Increasing Subsequence using Fenwick Tree](#)
13. [Queries for Number of Distinct Elements in the Subarray](#)
14. [Number of Elements less than or equal to a given number in a given subarray](#)
15. [Count Inversions using Fenwick Tree](#)
16. [Two Dimensional Fenwick Tree](#)
17. [Binary Indexed Tree or Fenwick Tree](#)
18. [Range Update and Range Queries in Binary Indexed Tree](#)
19. [Binary Indexed Tree: Range Update and Range Queries](#)
20. [Querying the Number of Distinct Colors in a Subtree of a Colored Tree using BIT](#)
21. [Minimum Possible Integer After at Most K Adjacent Swaps On Digits](#)
22. [The Skyline Problem](#)

## **Sparse Table**

1. [Matchstick Problem](#)
2. [Find the S-value of the Given Subarrays Using Mo's Algorithm](#)

## **Set**

1. [Implementing Sets Without C++ STL Containers](#)
2. [Fair Candy Swap](#)
3. [Count the total numbers with no repeated digits in a range](#)
4. [Count of Isogram Strings in a Given Array of Strings with Length at Least K](#)
5. [Maximize count of distinct elements in a subsequence of size K in given array](#)

6. [Find numbers in the range \[L, R\] that are coprime with all given Array elements](#)
7. [Count Of Pairs In Given Array Whose GCD Is Not Prime](#)

## Data Structures and Algorithms

We have already discussed data structures and now it is time to have a look at Algorithms and put the terms together as Data Structures and Algorithms to see why is it trending all over in the computer science community.

### Algorithms

In mathematics and computer science, an algorithm is defined as the set of instructions/commands given to solve a problem. For example, giving instructions to a computer to sum 2 or more numbers, finding prime numbers from a bunch of given numbers, etc.

We have a variety of algorithms which are as follows:

1. [Algorithm Analysis](#)
2. [Recursion](#)
3. [Backtracking](#)
4. [Dynamic Programming](#)
5. [Greedy Algorithms](#)
6. [String Processing](#)
7. [Divide and Conquer](#)
8. Graph Algorithms
9. [Searching Techniques](#)
10. [Sorting Techniques](#)
11. Branch and Bound Algorithms
12. [Bit Manipulation](#)
13. [SQRT Decomposition](#)

### Algorithm Analysis

1. [Introduction of Time Complexity](#)
2. [Introduction to Space Complexity](#)
3. [Asymptotic Notations](#)
4. [Time & Space Complexity for loops](#)
5. [Trick questions from Time & Space Complexity](#)
6. [Iteration Method](#)
7. [Recursion Tree Method](#)
8. [Interesting Questions from \(Substitution, Iteration, Recursion Tree, Master\)](#)
9. [Time & Space Complexity of Searching Algorithms](#)
10. [Time & Space Complexity of Sorting Algorithms \(Quadratic time algorithms\)](#)
11. [Time & Space Complexity of Sorting Algorithms - 2 \( \$N \log N\$ \)](#)
12. [Time & Space Complexity of Graph Algo - 1](#)
13. [Time & Space Complexity of Graph Algo - 2](#)
14. [Time & Space Complexities of Graph Algo-3](#)
15. [Time and Space Complexity of Linear Data Structures](#)
16. [Time and Space Complexity of Non-Linear Data Structures](#)
17. [Recursion & Backtracking Time Complexity](#)

### Recursion

1. [Types Of Recursion](#)

2. [Tail Recursion](#)
3. [Different ways to add parentheses](#)
4. [Josephus Problem](#)
5. [Sum of the combination of numbers | Part-1](#)
6. [Sum of the combination of numbers | Part-2](#)
7. [How to find all the palindromic partitions of a string](#)
8. [Rat In A Maze](#)
9. [Word Search](#)

## **Backtracking**

1. [Backtracking and Recursion](#)
2. [Min-Max Algorithm](#)
3. [N-Queen](#)
4. [Generate Parentheses](#)
5. [Stone Game](#)
6. [Sudoku Solver](#)
7. [Word Break Problem using Backtracking](#)
8. [Tug Of War](#)
9. [Permutations](#)
10. [Implement Hamiltonian Cycle](#)
11. [Additive Number](#)
12. [The K-th Lexicographical String of All Happy Strings of Length 'N'](#)
13. [Subsets](#)
14. [Subsets \(ii\)](#)

## **Dynamic Programming**

1. [How to solve a dynamic programming problem?](#)
2. [Memoization vs Tabulation](#)
3. [Overlapping substructure vs overlapping sub problems](#)
4. [Subsets](#)
5. [0-1 Knapsack](#)
6. [Count Number of subsets with given Sum](#)
7. [Subset Sum Problem](#)
8. [Coin Change: Minimum Number Of Coins](#)
9. [Unbounded Knapsack](#)
10. [Target Sum](#)
11. [Longest Common Subsequence](#)
12. [Longest common substring](#)
13. [Longest Palindromic Subsequence](#)
14. [Minimum insertion to convert the string to a palindrome](#)
15. [Longest Repeating Subsequence](#)
16. [LCS of 3 strings](#)
17. [Shortest Common Supersequence](#)
18. [Distinct subsequences](#)
19. [Regular Expression Matching](#)
20. [Wildcard Matching](#)
21. [Best time to buy and sell stock](#)
22. [Best time to buy and sell stock II](#)

23. [Best Time to Buy and Sell Stock III](#)
24. [Best Time to Buy and Sell Stock with at most K Transactions](#)
25. [Best time to buy and sell the stock with cooldown](#)
26. [Edit Distance](#)
27. [Wine Selling](#)
28. [Maximum Product Subarray](#)
29. [Maximum Area of the Square Submatrix](#)
30. [Maximal Square](#)

## **Greedy Algorithms**

1. [Activity Selection problem and Greedy Algorithm-](#)
2. [Job scheduling algorithm](#)
3. [Huffman Encoding](#)
4. [Gas Station](#)
5. [Minimum Number of Platforms Required for a Railway/Bus Station](#)
6. [Merge Intervals](#)
7. [Maximum Disjoint Intervals](#)
8. [Maximum number of overlapping intervals](#)
9. [Shortest Unsorted Continuous Subarray](#)
10. [Queue Reconstruction by Height](#)
11. [Find maximum meetings in one room](#)
12. [Reduce array to a single element by repeatedly removing an element from any increasing pair](#)
13. [Next Permutation](#)
14. [Minimize Cash Flow among a given set of friends who have borrowed money from each other](#)
15. [Divide 1 to n into two groups with a minimum sum difference](#)
16. [Fractional Knapsack Problem](#)
17. [Minimum initial vertices to traverse the whole matrix with given conditions](#)
18. [K Centers Problem](#)
19. [Shortest Superstring](#)
20. [Minimum Number of Arrows to Burst Balloons](#)
21. [Find Minimum Number of Arrows Needed to Burst all Balloons](#)
22. [Equilibrium Point](#)
23. [Product of array except self](#)
24. [Jump Game](#)
25. [Jump Game II](#)
26. [Boats to Save People](#)
27. [Get Equal Substrings Within Budget](#)
28. [Number of wonderful substrings](#)

## **String Processing**

1. [String Hashing](#)
2. [Find All Occurrences of the Pattern in the String](#)
3. [Minimum Repetitions of String A, to Generate String B as its Substring](#)
4. [Shortest Palindrome](#)
5. [Find the longest proper prefix that is also a suffix](#)
6. [Repeated Substring Pattern](#)

## Divide and Conquer

1. [Introduction to the Divide and Conquer Algorithm](#)
2. [Fast Fourier Transform for polynomial multiplication](#)
3. [Fibonacci numbers](#)
4. [Tiling Problem using Divide and Conquer algorithm](#)
5. [Check if a number is a palindrome or not without using any extra space](#)
